An Introduction to SAS/IML® Studio for SAS/STAT® Users

Rick Wicklin, SAS Institute Inc.

ABSTRACT

SAS/IML is a programming language for high-level matrix-vector computations. IMLPlus is an extension of SAS/IML that contains additional programming features that enhance IML. IMLPlus is the language of SAS/IML Studio (formerly known as SAS Stat Studio), new statistical software in SAS 9.2 that is intended for data analysts who write SAS programs to solve statistical problems but who need more versatility for implementing modern algorithms in data analysis and model building.
