Notes: Data with respect to salaries and bonuses are self-reported by graduates (without anonymity) and whenever possible verified by employers in cases where placement is arranged by the Institute (i.e., most candidates). One graduate was on leave from the military and returned to service. All other job placements are full-time paid positions. Data are made public here to guide prospective students and employers. Annual base salary figures do not include signing bonuses, relocation allowances or other forms of one-time compensation guaranteed upon signing. Conditional job offers (i.e., those requiring security clearance prior to employment) or other public sector employment are not included in salary data. As a STEM-qualified degree, international MSA graduates are eligible for Optional Practical Training (OPT). Commencement is typically held on the first Saturday in May. DISCLAIMER: The Institute has a proven track record for placing graduates in the analytics profession, but it does not under any circumstance offer a guarantee of employment upon completion of the MSA degree.

## PAYBACK PERIOD CALCULATION

$\underset{\text { (in months) }}{\text { Payback Period }}=\frac{\text { (Pre-MSA Salary + Tuition) }- \text { Signing Bonus }}{\text { Post-MSA Salary }- \text { Pre-MSA Salary }} \times 12$

Notes: The response rate was 100-percent. Respondents provided information about their preand post-MSA annual base salaries, signing bonuses, and residency status (which determines tuition payments). Seventy-two percent of respondents were NC residents, and 55-percent were employed full-time prior to entry. The median salary increase was $\$ 43,000$; all but two respondents reported an increase in salary. The ROI payback period calculated for each candidate employed by graduation, based on their individual circumstances (residency, tuition, pre- and post-salaries, and signing bonuses), yielded a median payback period of 23 months.

Students are assumed to forgo one-year of earning, even though the MSA program is only 10months in duration. Pre-MSA salaries ranged from $\$ 40,000$ to $\$ 154,000$. The payback calculation does not take into consideration interest incurred by students who borrow to finance their education.
