Notes: Data with respect to salaries and bonuses are self-reported by graduates (without anonymity) and whenever possible verified by employers in cases where placement is arranged by the Institute (i.e., most candidates). Two graduates returned to a previous employers. Two graduates will enter a paid, employer-sponsored training program for one year before entering regular full-time employment. All other job placements are full-time paid positions. Data are made public here to guide prospective students and employers. Annual base salary figures do not include signing bonuses, annual bonuses, equity or options, relocation allowances, or other forms of one-time compensation guaranteed upon signing. Conditional job offers (i.e., those requiring security clearance prior to employment) are not included in salary data. As a STEM-qualified degree, international MSA graduates are eligible for Optional Practical Training (OPT). Commencement is typically held on the first Saturday in May, and data are reported each year on or about May 15 for consistency.

DISCLAIMER: The Institute has a proven track record for placing graduates in the analytics profession, but it does not under any circumstance offer a guarantee of employment upon completion of the degree.

## PAYBACK PERIOD CALCULATION

$$
\underset{(\text { in months })}{\text { Payback Period }}=\frac{\text { (Pre-MSA Salary + Tuition) }- \text { Signing Bonus }}{\text { Post-MSA Salary }- \text { Pre-MSA Salary }} \quad \times 12
$$

Notes: Respondents provided information about their pre- and post-MSA annual base salaries, signing bonuses, and residency status (which determines tuition payments). The median salary increase was $\$ 42,500$; all but one respondent reported an increase in salary. The ROI payback period is calculated for each candidate employed by graduation, based on their individual circumstances (residency, tuition, pre- and postsalaries, and signing bonuses)..

Students are assumed to forgo one-year of earning, even though the MSA program is only 10 -months in duration. Pre-MSA salary interquartile range was from $\$ 42,000$ to $\$ 71,500$. The payback calculation does not take into consideration interest incurred by students who borrow to finance their education.
